TECHNICAL SUMMARY

Cloud Tech: AWS, Azure
Code: C#, .Net Core, ASP.NET, MVC, Web Api, express, node.js, JavaScript, React, Sass, HTML, CSS, SQL, JSON, XML, JAVA, Powershell, bash, Kotlin, Swift, TDD, xUnit
Architectures: REST API, Microservices, SOA
Systems: RabbitMQ, Redis, MongoDB, IIS, traefik
Platforms: Windows, Mac, Linux, Docker, Android, iOS

Design: Figma, Sketch, Visio, UI/UX, UML, IA, Photoshop
Tools: Git, Jenkins, Azure DevOps, Visual Studio, Android Studio, XCode, TFS
Methodologies: Agile, Scrum, Kanban, SAFe

PROFESSIONAL EXPERIENCE

Senior Software Architect
InComm - Serve St Petersburg, FL   **4/2018 – 5/2020**
- Designed and architected a new API for all mobile and Ui apps using DotNetCore 3.1 running on Docker-Linux containers which reduced resource consumption by over 90%.
- Provided cross-language code reviews and architecture guidance for client application modernization to Swift, Kotlin, React and .Net core apps.
- Lead the project team to uplift the legacy MSBuild deployment code to migrate 225 applications from American Express to InComm data centers.
- Designed and reviewed code for security and completeness for all product initiatives for presentation tier applications including mobile, web, SMS, and email systems.
- Collaborate with business stakeholders to prioritize architecture delivery, reliability, scalability, and security in line with business goals.

Lead Technical Architect / Tech Lead
American Express - Serve St Petersburg, FL   **10/2012 – 4/2018**

- Collaborate with business stakeholders to prioritize architecture delivery, reliability, scalability, and security in line with business goals.
- Converted documentation from SharePoint to XWiki decreasing integration times from weeks with multiple meetings to hours with an initial knowledge share-out
- Architected and launched the implementation of the address suggestion feature.
- Defined roadmap and project plans for the adoption of APIs.
- Consulted and advised the development of 3 new systems to be deployed with our API governance standards.
- Engaged C-level leadership to renew our commitment to the Tampa Bay Technology Forum.
- Enhanced the website to use a new SSO authentication platform
- Expanded the product for internalization and localization including UI and validation.
- Launched our first tax business line user experience.
- Launched a multi-SKU product line expansion, to diversify our product portfolio.
- Oversaw the transition from CSS to SASS for web design, streamlining design processed
- Converted our branding and theming logic to remove inter-team dependencies and increase velocity.
- Proposed and oversaw the migration of risk analysis calls from presentation to platform tier improving data reliability to 99%.
- Liaison between the Product Owner and the Dev team; assist the Product Owner in backlog management
- Collaborate with a high performing team able to navigate conflicts, challenges, and opportunities for growth
- Promoted cooperation and help the team operate at a sustainable, peak velocity
- Eliminated blocking issues beyond the team's authority
- Enforced scrum practices, (WIP) limits, and built-in quality expectations, holding the team accountable
- Facilitated standard agile ceremonies including stand-ups, planning, refinement, and retrospectives
- Helped develop and adhere to release plans

Founding Developer / Software Engineering Manager
GroupCommerce - NYC   **2/2010 –10/2012**

- Sourced and managed a third-party vendor to develop of our iOS app
- Lead and managed seven developers building mobile and desktop websites
- Initial developer, team lead, and manager overseeing ASP.NET MVC development of 18 websites in 18 months going
- from 0-$10 million in gross sales with one of the first PCI compliance apps on AWS Cloud.
- Introduced and deployed cruisecontrol.net and then Jenkins CI system

Jonathan Kind

jon.kind@gmail.com
727-851-6424

- Managed SCM migration from svn to Github
- Architected, configured, and maintained 30 Windows/IIS AWS EC2 instances

Founder
Kindproject   **1/2009 –10/2012**

RSG Media - Contract
- Lead technical meetings for asp.net team ramp up including SCM setup, agile development practices, code review practices
- Wrote asp.net webforms and MVC implementation guidelines
- Developed information architecture designs
- Provided UI wireframes

Hsn.com - 3rd party Contract
- Lead technical discussions for migration from asp.net webforms to MVC
- Coded enhancements for hsn.com branded card payment promotions (asp.net webforms)

TownLeaders – Project
- Project management and development of asp.net MVC application for townleaders.com
- Procured, developed, and lead a team of offshore developers for project implementation
- Provided ongoing code and outsourcing oversight
- Coded Facebook, Twitter, and API integrations

Google 5/2008-1/2009
- Designed integration of Google Account single sign-on for multiple DoubleClick products.
- Updated asp.net forms authentication to work with Google authentication as well as coded and designed migration workflow and screens.

EDUCATION
University of Georgia 1996-1999
Bachelor of Science - Environmental Economics & Management

ASSOCIATIONS
Tampa Bay Technology Forum - Awards Judge and Event Committee Member
Broadwater Civic Association Board Member and Treasurer

Certifications
AWS Cloud Practioner, 2022
Certified ScrumMaster, 2005
